

# Bark for Schools Offers Free Safety Solutions

Bark for Schools is a free and robust school safety solution. Your administration can help protect students by monitoring G Suite and Office 365 accounts for digital dangers. Bark will alert you to potential issues like cyberbullying, sexual content, self-harm, suicidal ideation, drug use, threats of violence, and more.

You can also enable web filtering to block games, pornography, streaming services, and other content that may undermine a positive learning environment. With world-class support available seven days a week, our account monitoring and web filtering tools can help keep your students safe — at no cost to you or your community.

## Web Filtering

Allow or block specific websites or filter by category. You can also generate activity reports.

## Email Alerts

We send Severe Alerts to all of your designated admins via email.

## G Suite Monitoring

Detect potential issues in Gmail, Drive, Gchat, and Google Docs (which students are now using as a secret chatroom).

## Office 365 Monitoring

Detect potential issues in OneDrive, Outlook, OneNote, and Microsoft Word documents.

## World-Class Support

Our support team behind the scenes is one of the best in the business. You can contact us through your dashboard or our website. We would love to hear from you!
