bark

3 ways to transform online safety for students with disabilities

Bark can help you empower students with disabilities to navigate the digital world more safely and confidently.

ONE
Strengthen digital safety skills and accountability

Children with disabilities face increased online risks, making safety measures crucial. The Bark Phone is designed for protection, going beyond standard parental controls.

> "The Bark Phone has helped us make the online world a little bit smaller ..We can [then] increase exposure slowly and gradually...so when they transition into independence they transition with healthy technology skills and boundaries."

TWO
Provide personalized learning and growth opportunities

Integrating technology into learning environments has been shown to significantly benefit K–12 students with disabilities, and digital literacy powers a more tailored learning experience.

> "It helps us to talk about social interactions. It's a great tool to teach social skills."

THREE
Support inclusive practices

Inclusion fosters belonging, improving mental well-being. By providing measures that support safe access to the internet, the Bark Phone provides online safety while offering a sense of normalcy, helping kids navigate the digital world with confidence while enjoying the benefits of online social interactions. Alerts add protection against certain risks posed by social media, like cyberbullying and feelings of anxiety or depression.

> "It's helped my son feel more like a teenager. He struggled with social skills, but now he connects with friends and feels included."
