bark

3 ways to support your child with safer access to technology

Bark empowers teens and young adults with a disability to navigate the digital world more safely and confidently.

ONE
Safety planning

Children with disabilities face increased online risks. Bark offers unmatched protection through:

- Monitoring across 29 categories, including self-harm, bullying, predators
- Texts can't be deleted, providing full transparency
- Real-time alerts to help you create a safety plan and respond early to issues

TWO
Skill development

Learning independence is essential. Bark supports:

- Development of daily living skills with safer, guided device use
- Access to adaptive apps and a customizable interface
- Ongoing learning oppurtunities through parent-child conversations triggered by alerts

THREE
Empowerment & inclusion

Bark helps your child confidently connect with the world as well as:

- Communicate with their community, peers, and caregivers
- Use built-in GPS tracking to support both safety and autonomy
- Stay mentally well with alerts that can signal emotional changes

How to get more information on available devices

1. Find Bark in the CLTS provider registry.
2. Submit a request to purchase a Bark product with your CLTS provider liaison utilizing Medicaid funding.
3. Once the request is received and approved, the product will ship direct.

bark
