

Here's how the Bark Phone stands out from the rest:

- 1 This is the only phone that comes with Bark's parental controls built in**
Bark's award-winning monitoring tool scans your child's texts, emails, social media, and apps for digital dangers and sends you alerts.
- 2 Completely customizable and grows with your child**
Every family — and kid — is different, which is why the Bark Phone allows you to add and remove the parental controls you think are best — exactly when you need to.
- 3 A kid's phone that doesn't look like a kid's phone**
This isn't a clunky "kid's phone," which can embarrass teens and tweens. It's a state-of-the-art Samsung that has robust parental controls.
- 4 Tamper-proof parental controls you can feel confident about**
Children can't delete text messages without permission, download workaround VPNs, or change the parental controls you set.
